TROPICAL AGRICULTURE PLATFORM
and
CAPACITY FOR CHANGE
Common Framework on Capacity Development for Agricultural Innovation Systems

Trevor Nicholls
CEO CABI, Steering Committee Member
Tropical Agriculture Platform
Capacity needs in the Tropics: the G20 establishes TAP

- Low and lower-middle income countries, which are mainly located in the tropics, often lack capacities in support of agricultural innovation;
- To address this gap, the G20 launched the Tropical Agriculture Platform;
- With more than 40 partners, TAP is a multilateral facilitation mechanism to promote greater coherence and impact of CD for AIS;
- Based on regional needs assessments (CIAT, FARA, SEARCA) carried out in 2013, the TAP Action Plan was developed;
- Since 2015, the TAP Action Plan is supported by the EU-funded Capacity Development for Agricultural Innovation Systems (CDAIS) project for global and country results;
Global coherence of CD approaches for AIS

Advocacy and policy dialogue

Common Framework on CD for AIS

TAPipedia knowledge hub
The TAP Framework

1. Review Report: Review of existing resources on CD for AIS
2. Conceptual Background: Theory, concepts, principles, definitions
3. Synthesis: Summary of Conceptual Background
4. Guidance Note on Operationalization: Approach and tools

Framework Products
The TAP Framework

• *The Common Framework on CD for AIS*

- Was developed by experts through a highly participatory process;
- Promotes a shift of mind-set and attitudes;
- Provides concepts, principles, approaches and tools to
  - better understand the AIS architecture,
  - assess CD needs,
  - plan and implement CD interventions,
  - monitor and evaluate CD interventions;
- Puts focus on facilitation, learning, documentation and knowledge management for enabling innovation.
Agricultural Innovation System (AIS)

The Common Framework promotes a system perspective on agricultural innovation, since agriculture increasingly involves complex interactions among stakeholders at multiple levels.
The Common Framework identifies **4 + 1 key capacities** for AIS to perform effectively. These apply to all three dimensions of CD.

The 4 capacities on the left are the core of an overarching capacity to **adapt and respond in order to realize the potential of innovation**.
# Functional capacities

## The key capacities in detail

The Common Framework proposes a dual pathway approach to CD for AIS. This conceptual approach includes two aggregated processes: at **system level** and at **innovation niche level**.

**System level**: the focus is on the functionalities and performance of the system as a whole.

**Innovation niche level**: CD takes place around specific innovation agendas, in which actors of all types allocate time and resources to achieve change.
Innovation niche

Spaces in which groups of AIS actors become part of a learning process
Starting point for capacity development activities

Examples:
- Value-chain related multi-stakeholder platform
- Community production centres
- Project on improving agro-forestry techniques
- Initiative to promote climate smart agriculture
- Sustainable sourcing of resources by corporation XY
- Scheme for efficient small-scale irrigation
The Framework proposes a CD CYCLE in 5 STAGES for the operationalization of CD interventions in AIS.

The CD cycle stimulates learning and interactions between the 3 CD dimensions.
TAP & CDAIS Meetings - Kigali - Jan 2016

- 50 participants from TAP Partner organizations and from CDAIS pilot countries + national participants;
- Presentation and discussion of TAP achievements and upcoming activities;
- TAP Framework approved;
- Cross-country exchange on experiences with agricultural innovation in general and the CDAIS project in particular.
Validation of the Framework

- The EU-funded **CDAIS project** provides opportunity to test the Framework in 8 countries: Angola, Bangladesh, Burkina Faso, Ethiopia, Guatemala, Honduras, Laos and Rwanda;
- Project is jointly implemented by **Agrinatura and FAO** in collaboration with national stakeholders;
- **Scoping studies** to map AIS stakeholders and identify intervention areas carried out or currently in progress;
- **Inception workshops** held in four countries, with the other four workshops being currently organized for Q1 2016;
- **Other project activities**: Needs assessments, marketplaces, policy roundtables and capacity development interventions in selected innovation partnerships.
AIRCA adopts CDAIS framework

• Association of International Research Centres in Agriculture
• Expertise across range of ecosystems & substantive crop diversity
• Core competencies in health of humans, plants, animals & landscapes
• Integrated approaches to solving development problems at scale
• Ability to respond rapidly & efficiently in the face of new problems
• Long-established track record of working with member-country governments, NARS & the private sector
TAPipedia knowledge hub:

- allows TAP Partners and other stakeholders to share their CD for AIS resources and initiatives;
- presents, explains and promotes the TAP Framework, including learning modules.

http://tapipedia.org/
Conclusions

- Thanks to the EU and to other contributions, funding is available for the implementation of the TAP Action Plan;
- TAP is on track to fulfil its goal of providing coherence for capacity development initiatives in the field of agricultural innovation;
- TAP is a vibrant platform and in Kigali Partners confirmed their engagement to:
  - advocate for and apply the TAP Framework,
  - support the content development and use of TAPipedia,
  - contribute to global, regional and national policy dialogue events and marketplaces organized under the CDAIS project.
